KIRIL MILOSEVSKI

DEVOPS ENGINEER

+389 76 659 775 · kiril_milosevski@yahoo.com · Skopje, North Macedonia · LinkedIn · GitHub

PROFESSIONAL SUMMARY

DevOps Engineer designing and operating production AWS infrastructure for SaaS platforms, with strong experience in Terraform, ECS, Kubernetes, CI/CD, observability, security, and cost-efficient cloud architecture.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS, EC2, ECS, ECR, CloudWatch, Lambda, Terraform, IaC, IAM, networking, DNS, VPN, Cloudflare

Containers & Delivery: Docker, Kubernetes, Helm, Argo CD, GitHub Actions, GitLab CI/CD, CI/CD automation

Observability & Operations: Grafana, Prometheus, Grafana Alloy, Loki, Datadog, Zabbix, monitoring, alerting, incident response, reliability

Data, Security & AI: PostgreSQL, Prisma, SQL, Redis/Valkey, Linux, Bash, Keycloak, Traefik, Trivy, Gitleaks, OpenCode, LLM tools, multi-agent workflows

PROFESSIONAL EXPERIENCE

The Unit | DevOps Engineer

Full-time, Remote | Apr 2026 – Present

- Design and own full AWS infrastructure (Terraform IaC) for multiple client environments across dev–prod, actively operating 50–100 containers.
- Own company-wide secure enterprise VPN architecture, migration, and access controls — delivering robust, low-latency remote connectivity and hybrid-cloud security.
- Design and manage high-availability DNS across hybrid-cloud environments, optimizing resolution, security, redundancy, and seamless domain routing.
- Own ~20 GitHub Actions / GitLab CI/CD workflows for ECS deployments, Terraform, PR checks, security scanning, and operational automation — reducing manual effort and deployment risk.
- Implement and operate observability stacks (Grafana, Prometheus, Alloy, CloudWatch) with dashboards and alarms for multiple clients; drive incident response and reliability improvements.
- Collaborate with development teams on releases and DevOps workflows; operate containerized services with focus on environment parity, performance, and cost-aware operations.

B2B2C SaaS iGaming Platform | DevOps Engineer (Independent Client Project)

Separate engagement | Feb 2026 – Present

- Designed and built the full AWS infrastructure for a modular B2B2C iGaming marketplace (consumer, operator, API, data-ingestion, and reporting services) with strong focus on security, isolation, and cost-efficient design.
- Implemented Terraform-managed persistent and disposable stacks covering VPC, IAM least-privilege access, ECR, ECS, Service Connect, encrypted EBS, Valkey, CloudWatch Logs, and SSM.
- Automated changed-service ECS deployments with GitHub Actions using digest-pinned revisions for safe, controlled rollback; implemented Prisma database migration tasks as part of the delivery pipeline.
- Integrated Dockerized services (API, consumer, operator, PostgreSQL, Redis/Valkey, Keycloak, Traefik, OAuth2 Proxy, Cloudflare Tunnel) with CI/security gates (Trivy, Gitleaks, GitHub OIDC) and OpenCode multi-agent workflows, enforcing security and access controls end-to-end.

Aristocrat Interactive | TechOps Engineer

Jan 2025 – Mar 2026

- Led Terraform migration of monitoring for all 30 production clients from Pingdom to UptimeRobot, standardizing uptime checks across the estate.
- Built Terraform-managed CloudWatch alarms and metrics for 30 production clients to improve visibility and incident response.
- Automated Redis flush operations and user password resets via Jira + AWS integrations, significantly reducing manual operational workload.
- Oversaw cloud infrastructure (EC2, ECS, CloudWatch, Lambda, API Gateway, CloudFront, WAF, Athena); maintained Datadog and Zabbix monitoring and improved system availability.

BtoBet | Software Engineer

Aug 2022 – Dec 2024

- Set up web and API servers and configured, deployed, and monitored AWS services for new client environments.
- Developed SQL queries for onboarding and database migrations and integrated third-party service providers into the platform.
- Supported operational delivery by troubleshooting application and infrastructure issues across client environments.

EDUCATION & CERTIFICATIONS

University American College Skopje | BSc in Software Engineering | 2019 – 2022

Certifications: AWS Cloud Practitioner (CLF-C02) · Cloud Operations on AWS – Semos · Architecting on AWS – Semos · Grafana Foundations – Attainable
